PROFILE

Final year Data Science undergraduate (CGPA 3.7/4.0) with experience in building machine learning pipelines, LLM based applications, and agentic systems. Proficient in Python, scikit-learn, TensorFlow, and modern LLM frameworks. Passionate about building production ready ML systems that solve real world problems, with a growing focus on applying machine learning to cybersecurity.

EDUCATION

Bachelor of Science in Data Science	2022 – 2026
DHA Suffa University, Karachi, Pakistan CGPA: 3.7 / 4.0	
Intermediate (Pre-Engineering) 85%	2021 – 2022
The Smart College, Karachi, Pakistan	

PROJECTS

Hifazat (حفاظت) — FraudShield	Python LangChain NLP Llama 3 FastAPI
<i>AI Powered Fraud Detection Assistant</i>	
- Built an end to end fraud detection system that identifies scam messages in Urdu and Roman Urdu using Natural Language Processing and Large Language Models. - Developed custom text preprocessing and tokenization pipelines to improve classification performance on informal and code mixed language. - Implemented agent based decision workflows that analyze fraud risk, generate user alerts, and recommend protective actions. - Integrated mobile wallet transaction data models to support real time fraud monitoring for Pakistani fintech use cases.	
ThreatGuard-AI (Final Year Project, Ongoing)	Python FastAPI Scikit-learn Groq LLM
<i>Lightweight DDoS defense system built for small and medium-sized enterprises</i>	
- Developed a real-time traffic classifier that distinguishes DDoS attack patterns from legitimate traffic using ensemble ML models deployed behind a FastAPI service. - Integrated Llama 3.1 (via Groq API) to generate human-readable incident reports and mitigation steps for non-technical users.	
Intelligent Dataset Quality Auditor	FastAPI SQLAlchemy SciPy Scikit-learn Groq LLM
Automated data profiling tool that detects missing values, outliers, and schema drift, then uses an LLM to produce a plain-English quality report with remediation recommendations.	
Conversational RAG with PDF	LangChain Groq API FAISS Python
End-to-end retrieval-augmented generation pipeline letting users query multi-page PDFs through a conversational interface with source-level citations.	

TECHNICAL SKILLS

Languages: Python, SQL, Bash
ML / DL: Scikit-learn, TensorFlow, Keras, Pandas, NumPy, SciPy, Matplotlib, Seaborn
LLM & Agents: LangChain, LangGraph, Groq API, OpenAI API, Llama 3, Gemma, RAG,
Backend & Tools: FastAPI, Streamlit, SQLAlchemy, Pydantic, Git, Linux, Jupyter, VS Code

CERTIFICATIONS

Complete Generative AI with LangChain & HuggingFace (Udemy)
Complete AI, ML & Data Science Bootcamp (Udemy)
Azure AI Fundamentals (Microsoft)
Python Developer Course (Udemy)
Google Data Analytics Foundations (Coursera)
